

infinity L O O P

Infinity Loop is a networking website that allows an individual to connect with 100+ friends.

FEATURE 1

Diagram 1: In this screen, the owner of the profile appears as Yellow Star and few friends are shown in the circles according to their location in the globe. Big circles represent friends and small circles represent friends of friends. To view a detailed profile as seen in Diagram 3, user clicks on the desired picture of a friend (big circles).

Diagram 2: This screen represents the visualization of a network with over 100 connections.

FEATURE 1

Diagram 3: Information about the selected user's hobbies, past / current education and past/ current employment is demonstrated. In order to return to network screen (Diagram 1), user clicks on the pointed finger button on top left.

FEATURE 2

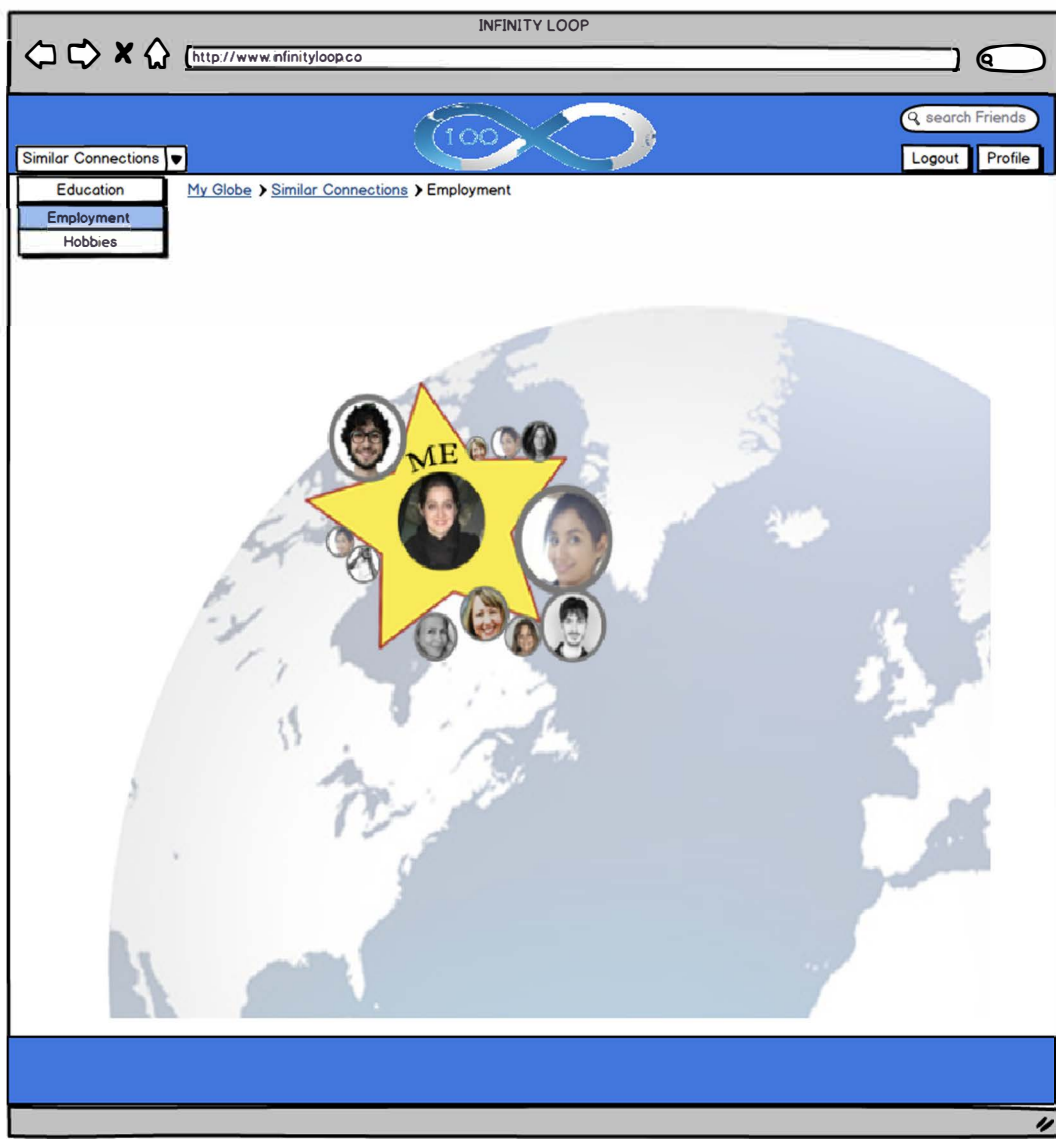

Diagram 4: There is a pop-down menu to identify similar network users. Users click on desired category (Education, Employment and Hobbies) to display similar network users. Similarity option #1; user clicks on "Employment" and then all users with a similar employment history are gathered around profile owner (Yellow Star).

FEATURE 2

Diagram 5: There is a pop-down menu to identify similar network users. Users click on desired category (Education, Employment and Hobbies) to display similar network users. Similarity option #2; the similarity categories are color-coded (i.e. Red). The user clicks on the desired category (i.e. employment) and all network users with a similar employment history are highlighted in corresponding color (Red). To view the detailed profile (Diagram 6) of a similar user, profile owner clicks on the picture of the friend.

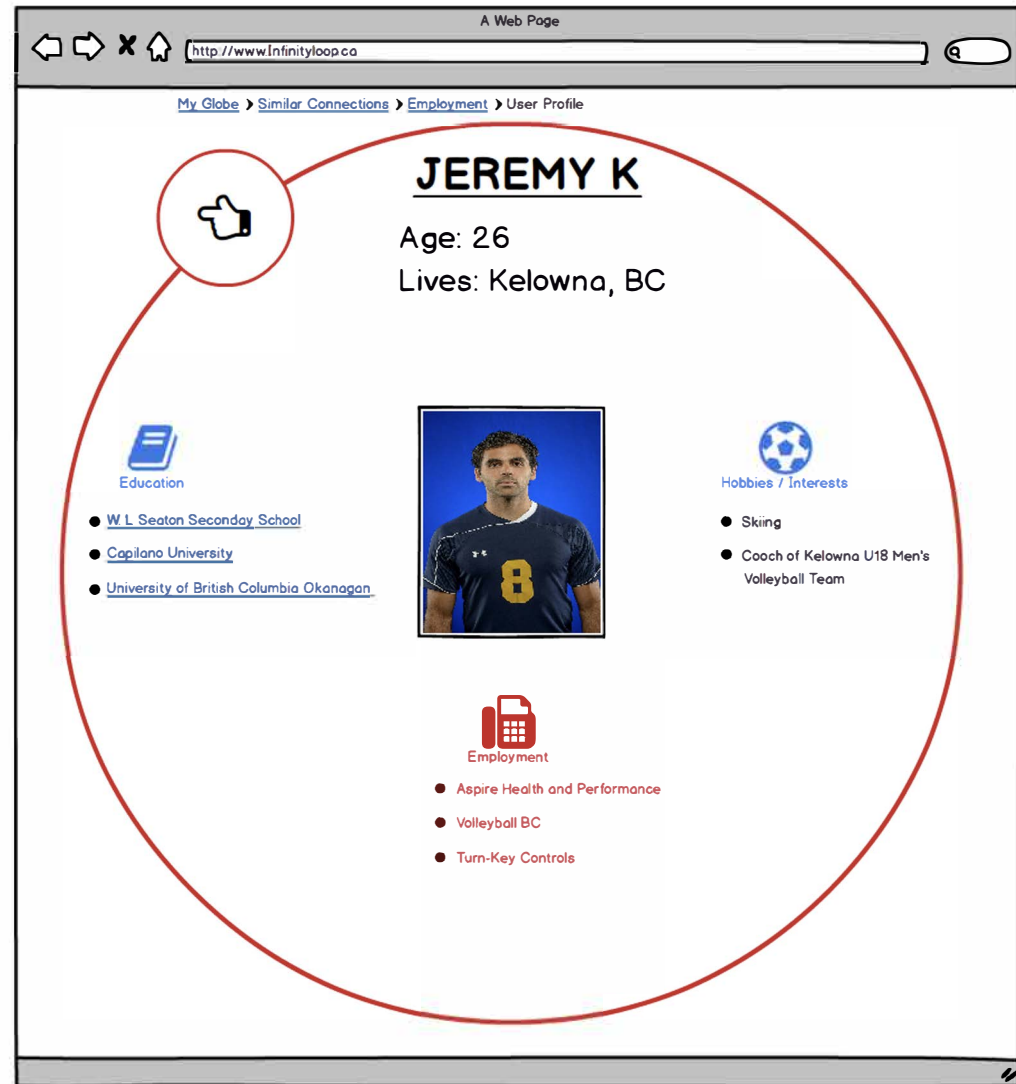

Diagram 6: Current screen is the detailed profile of a friend with employment similarities highlighted in corresponding color (Red). In order to return to Diagram 5, user clicks on the pointed finger on top left.

FEATURE 3

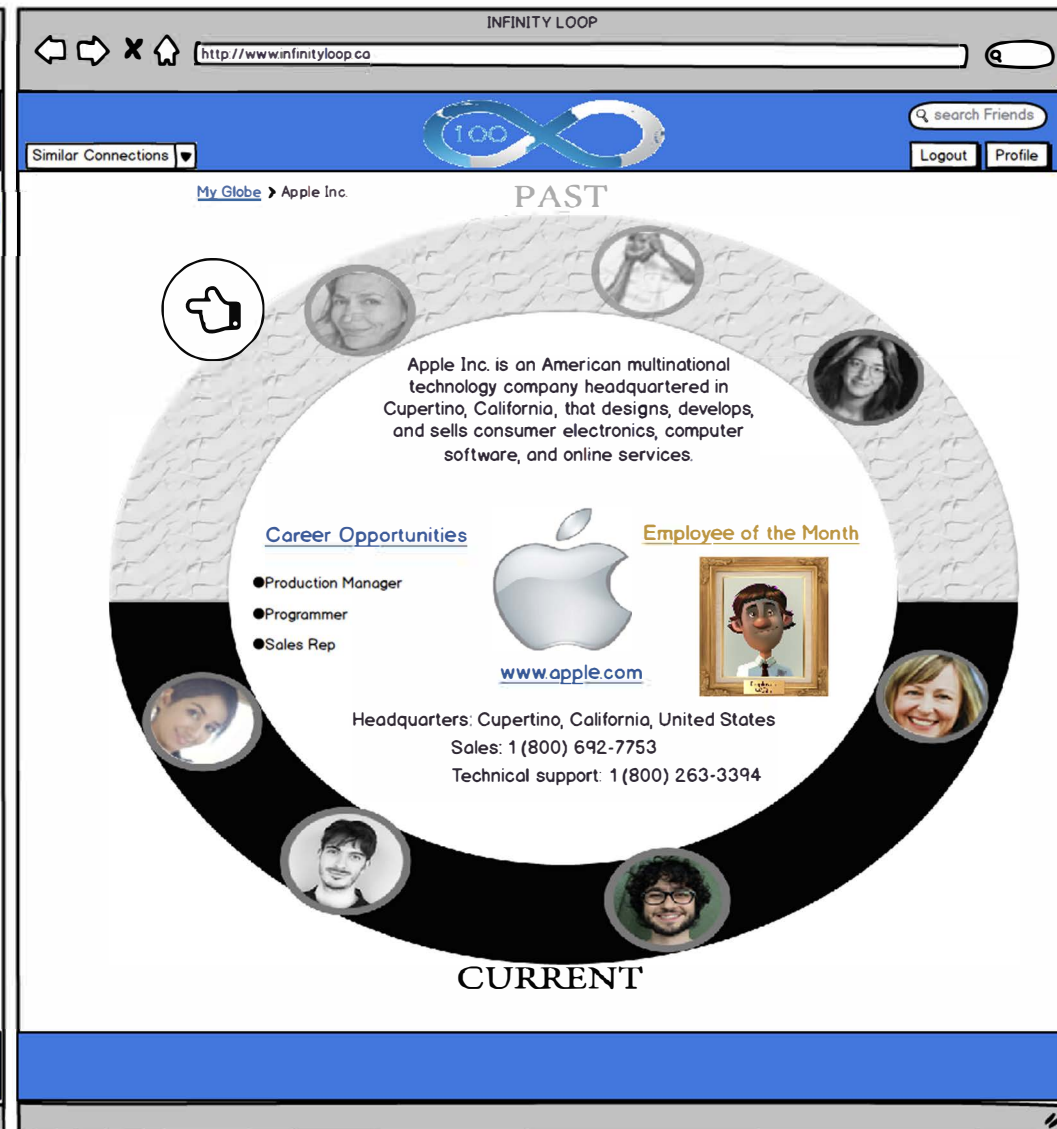

Diagram 7: This screen includes two toggle switches in top right (education institutes and organizations). In order to view educational institutes associated with network friends, the user clicks on education icon. To view organizations associated with network friends, user clicks on the organization icon on top right. Detailed information of an organization (Diagram 8) is shown by clicking on organization's icon.

Diagram 8: After clicking on organization icon, the detailed information of the company (Apple) is displayed. Pictures in the top half of circle (Grey section) represent past employees and pictures in bottom half of the circle (Black section) represent current employees of the organization. To communicate with any desired employee, the user clicks on the picture of a friend. To return to previous screen (My globe), user clicks on pointed finger at top left side.

FEATURE 3

Diagram 9: After one employee is selected, 3 communication options are presented(email, phone and linkedin). User clicks on desired form of communication. To return to previous screen (company information), user clicks on pointed finger on top left side.

Diagram 10: This screen shows all network users that are associated with the selected educational institute in Diagram 3 (Capilano University).To view profile of a friend who is associated with the selected educational institute (Capilano University),user can click on their picture. Also to view information about university, user can click on the university name (link).To return to user profile, click pointed finger on top left side.

FEATURE 3

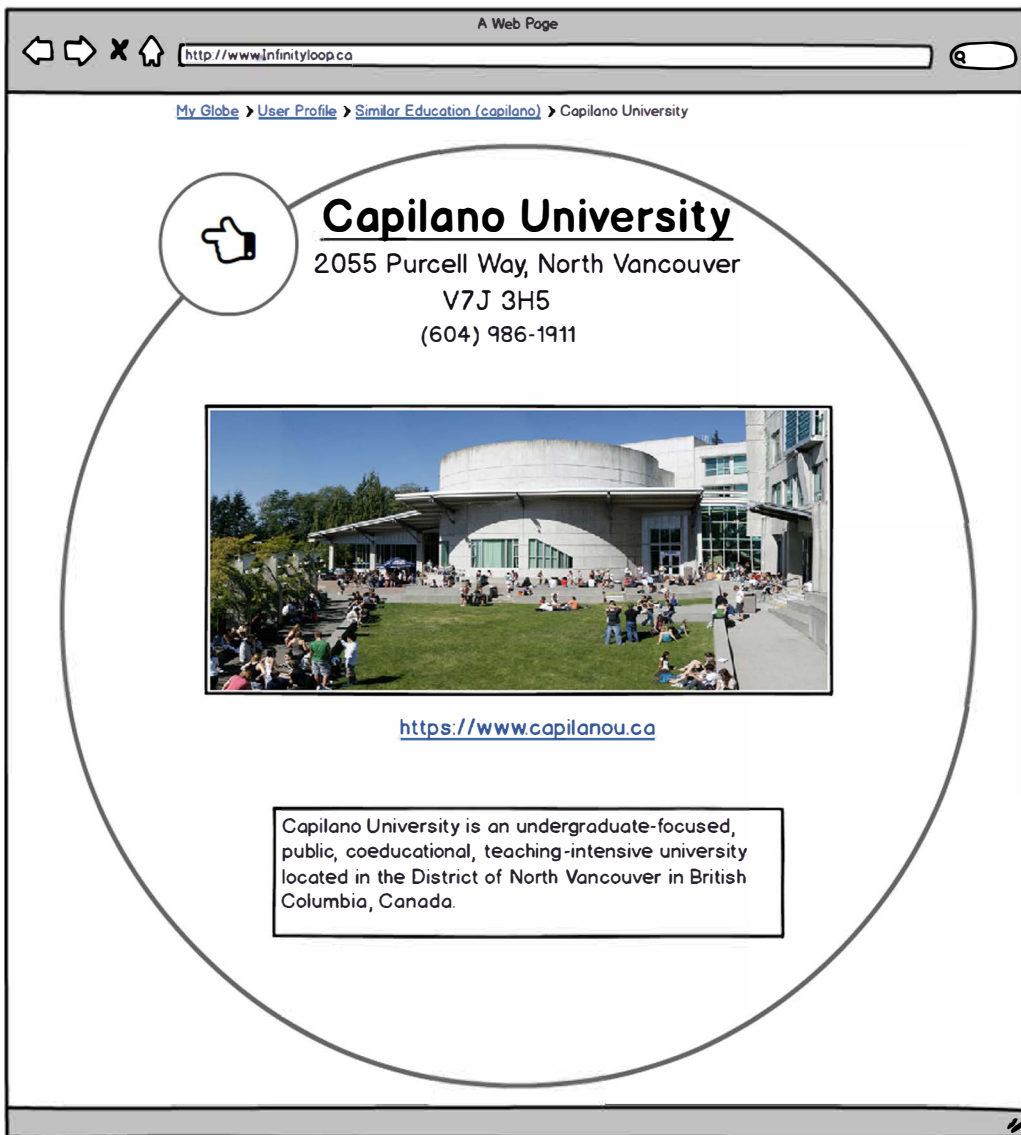

Diagram 11: Detailed information about selected university is displayed. To return to associated organization's page, user clicks on pointed finger.
